The Banksy Walled Off Hotel Box Set

Banksy Walled Off Hotel Box Set is a collection of prints hand-painted by Banksy's team housed inside a little white box frame.

Those were sold to the clients of the Banksy Walled Off Hotel in Bethlehem, Palestine, between 2017 and 2019. Collection is now being sold out.

Curators and experts are estimating the number of boxes around 6000 pieces.

The Walled Off Hotel

Opened in march 2017, the *Banksy Walled Off Hotel* is located in the Palestinian town of Bethlehem.

This hotel is by itself an artistic performance and installation questioning the israelian army infrastructure and the local tourism craze. It was advertised as the hotel with “the worst view in the world”.

The Hotel became instantly a major success and one of the most visited place in the region. It was closed between 2019 and 2021 because of the tension with the Israel state and because of the COVID and recently reopened.

Only people staying at the hotel had the possibility to buy the Banksy Box Set between 2017 and 2019. The Box Set has been sold out completely since 2019. The estimation is that 6000 have been sold.

Authentication and Aftermarket Value

Every Banksy Box Set comes with an Invoice from the hotel that acts as its certificate.

To ensure full transparency and complete assessment of the collection, the 1000 pieces will be authenticated by a certified art expert and experienced auctioneer.

Today aftermarket value of a Banksy Box Set is between 2500-4000 euros in Asia and 1500-2500 euros in France. Live market price can be found for instance on platforms like Artsy or 1stDibs.

How it works?

1/ GRAB IT

You get the NFT by either minting it on Magic Eden Launch Pad or purchasing it on the secondary market.
(*Magic Eden, Opensea, and every Solana market places*)

2/ THEN CHOOSE

Evey holder will have a **choice to make :**

A/ Keep the NFT in your wallet, speculate
on its future price, list or delist it

B/ Burn the NFT on the LCD LAB website
and redeem it to receive free of any charges
the banksy Walled-Off Box set

P.S. Consequently each burn reduces the remaining NFT supply available and the possibility for new buyers to acquire a Banksy.

The NFT

LCD Labs has designed 1000 Banksy-inspired Radar Rats to match the 1000 box sets.

There are different traits for each rats with different levels of rarity.

Yet rarity as no impact on which box set you will get. You cannot choose which box set you get. It will be selected randomly in the gallery reserve.

Every NFT is collateralized 1/1 by a Banksy Walled Off Hotel Box Set

The 1000 Banksy Box sets are stored in a secured vault

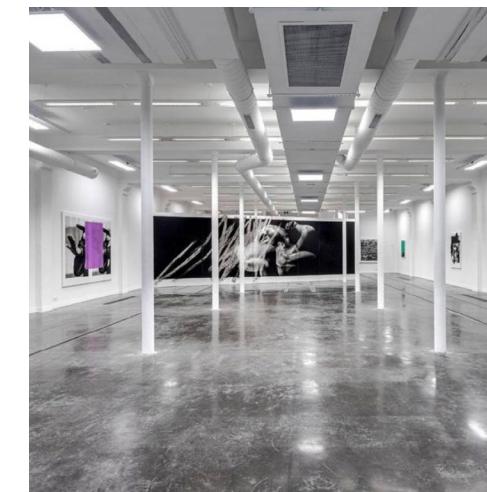

NFTs can be burned and redeem whenever you want

The more NFTs are burned the smaller the supply

Minting on Magic Eden on September 17th

The Project Team

LEO CAILLARD - Artist

Superare web3 artist + Stone Heads creator

Leo Caillard belongs to this new generation of artists associated with the significant changes that have been taking place since the 2000s. He believes there has been a radical return to the past, a sort of 'neo-Renaissance' where artists, and intellectuals seek to draw upon classical cultures to regain strong roots with a new way of thinking.

Followed by a large community on Instagram, his work has been exhibited in major institutions such as National Museums. He is a recognized web3 pioneer with important volumes on SuperRare. He created installations for the airports of Paris and Kings College in London.

BAPTISTE OZENNE - Renowned Parisian Art Gallerist & Collector

Strouk Gallery + Top Banksy Art Dealer

Based in Paris, Baptiste is one of the most influential gallerists in Paris. He is the art director for the Strouk Gallery and an important Banksy Collector. He has been supporting the emergence of a new generation of artists like Marcella Barcelo, Travis Fish, Jordy Kerwick, Robert Nava, Otani Workshop, Eddie Martinez and many more...

He will be responsible for ensuring smooth management of the Banksy Box Set Vault and managing smooth delivery for buyers.

The Project Team

ANDREW KOVALEV - LCD LAB managing director

2x start-up exits

Andrew "A1" Co-founder & managing director of LCD Labs. 2X successful company created and sold. 5+ years experience in Game Development industry. Passionate about WEB 3 and new technologies.

Andrew is leading all technical and business operations for LCD Labs.

ARIASTRA - co-CMO

Fortune 500 advisor + Sciences Po

Ari, based in New York, has been into blockchain since 2013. He had experience as a partner of a French communication agency advising Fortune 500 brands. In New York, he has been mostly working for the Solana ecosystem growth.

Passionate about technology and art since a very young age, he is an NFT collector both on Ethereum and Solana. He will be focused on building the LCD brand and reaching a broader art community through PR

The Project Team

OLIVIER LEGRIS - co-CMO

Sport-tech/web2 trailblazer (PSG, Manchester city)

Based in London, has 10 years of experience, working with major football clubs (Paris Saint-Germain, Manchester City, Chelsea FC) on their digital strategy and partnership. He is also involved in DAOs and a proud Solana Business Monkey.

He will lead the digital strategy and operations for the Banksy project.

AMINE MEDAOUI - Community Leader

Stone Heads Community Leader

I-Mean has built one of the most vibrant Solana communities around the stone head holders. Leading a team of experienced moderators and community members he is dedicated to making LCD Labs the most exciting place on Solana.
